TO USE THIS PRODUCT IN A MANNER
INCONSISTENT WITH IT LABELING

For Agricultural or Commercial Use Only

EPA Registration No. 279-3194

EPA SLN No. ID-030007

EMERGENCY CALLS: 800-331-3148

This label for AimTM Herbicide is valid until December 31, 2008 or until otherwise amended, withdrawn, canceled or suspended.

CROP	PEST	RATE OF APPLICATION
Grass Grown For Seed	Catchweed Bedstraw Common Lambsquarter Redroot Pigweed Russian Thistle	0.5 to 1.24 oz per acre 0.012 to 0.031 lb ai per acre

Directions For Use

Apply AimTM Herbicide alone or in tank mixtures with other herbicides to emerged and actively growing weeds. Apply to grass grown for seed in all tillage systems from 30 days before planting up to the jointing stage of growth. This product **does not** control weeds when soil applications are made pre-emergence to the weeds.

Make applications to emerged and actively growing weeds up to 4 inches tall and rosettes less than 3 inches across. **Coverage is essential for good control.** To control weeds not listed on this label, Aim may be tank mixed with other herbicides registered for use in grass grown for seed. Refer to the other product's label for restriction on tank mixing, and observe all label precaution, instructions and rotational cropping restrictions.

Apply in a minimum of 10 gallons per acre by ground. Use a nonionic surfactant having at least 80 percent active ingredient at 0.25 percent by volume, 2 pints per 100 gallons of spray solution. Under dry conditions the use of crop oil concentrate may improve weed control. The use of crop oil concentrate may increase leaf speckling on the leaves. Consult product label for mixing instructions.

Restrictions

Do not apply more than 1.24 ounces (0.031 lb ai) of AimTM Herbicide per acre per season including fallow or preplant burndown and labeled crop applications.

Do not harvest for grass hay or graze treated fields within 365 days of application. Do not feed screenings.

For use under this SLN label do not apply this product through any type of irrigation system.

Environmental Hazards

In order to mitigate risks to the endangered species, McFarlane's Four O'clock, the Idaho Department of Agriculture has defined a "no spray area" in Idaho County, Idaho south of longitude N 45 48.00', which crosses the county approximately four miles north of White Bird, Idaho.

In order to avoid damage to Water Howelia, do not make applications in Latah County within 4 miles of the city of Harvard.

ALL APPLICABLE DIRECTIONS, RESTRICTIONS, AND PRECAUTIONS ON THE EPA REGISTERED
AIM HERBICIDE LABEL (EPA Registration No 279-3194) MUST BE FOLLOWED.

THIS LABEL MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF PESTICIDE APPLICATION.
